

## # Dev B – Phase 5 Completion Certificate

This document confirms that \*\*Developer B\*\* has successfully completed all required deliverables for \*\*Phase 5\*\* of the Slice architecture.

---

### ## ✓ Completed Tasks

#### ### 1. Memory Wrapper Implementation

- Implemented `get\_memory\_context\_for\_text` in `src/slice/memory/interface.py`
- Ensures Phase 4 recall integration using `MemoryService.recall\_similar\_text`
- Full exception suppression per spec
- Returns correct Phase 5 output schema

#### ### 2. Unit Tests

- Added tests in `tests/test\_memory\_interface.py`
- Verified structure, behavior, determinism, and monkeypatched recall flow

#### ### 3. Documentation

- Added `devB\_memory\_wrapper\_notes.md` under `docs/phase5`
- Documented schema, error semantics, integration details

#### ### 4. Mocks for Orchestrator Testing

- Added:
  - `tests/mocks/mock\_memory.py`
  - `tests/mocks/mock\_risk.py`
  - `tests/mocks/mock\_llm.py`

#### ### 5. Branch Sync & Push

- All implementation, tests, and docs pushed to `feature/phase5-devB`

---

## ■ Status: \*\*Dev B is 100% complete for Phase 5\*\*

Dev A is now fully unblocked to complete:

- RiskSnapshot implementation
- Prompt builder
- SessionOrchestrator
- API endpoint
- Logging
- End-to-end tests
